- React Native
- SQL, MySQL
- Postgres
- MongoDB
- Git
- Github
- Bit Bucket
- Jira
- Heroku, cPanel
- Integration & Automation
- Zapier, Make.com
- Apache Kafka
- Docker

Professional Experience

Backend Developer, Nathan Digital 07/2023 – present | Dubai, UAE

- Built 10+ customized npm packages using TypeScript, enhancing platform functionality and reducing development time for projects.
- Collaborate with cross-functional teams for revamp of traditional to MCS architecture, improving scalability and modularity by 40%.
- Built configurable modules for leaves, letters, and approval flows, enabling customization through the UI resulting in a 50% reduction in configuration time.
- Implemented secure authentication and authorization mechanisms using JSON Web Tokens (JWT) and integrated Single Sign-On (SSO) solutions, including Microsoft SSO, ensuring seamless and secure user access across various services.
- Optimized database queries and conducted different strategies to improve application response times by 30%.
- Troubleshoot and debug issues across by establishing robust error handling and logging mechanisms and maintenance to enhancing system reliability by 30% and performance by 50%.
- Successfully migrated legacy data to the new microservices architecture for base and 8+ other clients, ensuring data integrity and continuity.
- Integration of workday APIs and zkteco biotime for attendance module, enhancing system functionality and configuration time by more than 30%.

JavaScript Developer, Reown Logics 10/2021 – 07/2023 | Lahore, PK

- Crafted landing pages for over 5 branding websites and a dashboard for an esports site, incorporated interactive animations and SEO best practices ensuring application performance and responsiveness with HTML5 and CSS3.
- Built a video recording web application to record/upload and share 60 seconds business proposal video, implementing both client-side and server-side using MediaRecorder API, React, NodeJS, MongoDB, AWS EC2 and AWS S3.
- Engineered the backend of a lead generation platform for job postings using NodeJS and Postgres, enhanced data management efficiency by 25%.

- Developed two feature-complete React Native mobile apps for abandoned vehicle reporting and travel planning, reducing development time by 30% and refined code reusability by 40% compared to native approaches.
- Integration of 3rd party APIs (LinkedIn, betterproposal.io, sheets) in more than 10 different CRMs like monday.com and make.com, utilizing both NodeJS and Zapier to make general flows automated and hassle-free.
- Built workflows and integrated webhooks, APIs to automate leads generation from 5 different CRMs to one single dashboard and reduced cost by more than 50%.
- Orchestrated seamless deployments of web applications on Heroku and cPanel, ensuring zero downtime and increased user satisfaction by 25% through efficient server management.

Web Developer Intern, Blue Box Packaging 06/2019 – 05/2021 | Lahore, PK

- Developed a node.js backend system, reducing order processing time by 30% and minimizing errors by 25%
- Optimized MySQL database structure, decreasing query response times by 50% and improving overall site performance.
- Upgraded page load speed by 70% through code optimization and image compression, along with adding it in the backend via sharp npm package.
- Achieved a 25% increase in click-through rates by optimizing meta titles and descriptions.
- Integrated email marketing campaigns with AWS SES and node.js cron jobs, resulting in a 15% increase in repeat customer orders
- Implemented a customer feedback system that boosted issue resolution time by 40% and increased customer satisfaction scores by 3 points.
